

THE - Impact Rankings 2025

Strengthen the means of implementation and revitalise the Global Partnership for Sustainable Development

17.2.3 International collaboration data gathering for SDG

International collaboration for data gathering related to the Sustainable Development Goals (SDGs) is an initiative undertaken by the university to enhance global efforts towards sustainability. This project involves partnering with institutions, organizations, and researchers worldwide to collect, analyze, and share data that supports the achievement of the SDGs.

The university facilitates workshops, conferences, and joint research activities that bring together experts from various fields to discuss challenges, methodologies, and best practices. By leveraging technology and networks, students and faculty engage in data collection efforts, focusing on areas such as poverty alleviation, education, health, and environmental sustainability.

This collaborative approach not only enriches the university's research capabilities but also contributes valuable insights to the global discourse on sustainable development, ultimately fostering a more informed and effective response to the SDGs.

Country wise number of research papers published with International Collaborators during the period 2019-1024 (Report generated through SciVal)

Saudi Arabia	274
Malaysia	219
South Korea	155
Thailand	129
United States	124

China	122
United Kingdom	113
Ethiopia	85
Russian Federation	78

Number of Research Articles with and without Collaboration

Type of collaboration	2019	2020	2021	2022	2023	2024	Overall
 International collaboration 	195	166	232	328	271	267	1,459
Only national collaboration	209	201	302	413	548	431	2,104
Only institutional collaboration	214	176	309	297	354	215	1,565
Single authorship (no collaboration)	13	14	24	8	10	3	72
Total	631	557	867	1,046	1,183	916	5,200
